LOCAL JOTTINGS

The Council and the Board of Trade don't seem to hit it off very well together, judging from Mayor Lambert's remarks at Council meetings. The Council regards the Board as somewhat of a joke, and the Board seems to reciprocate the sentiment.

Quite a number of local people missed their milk last Saturday when the new pound law was put into operation for the first time. No fewer than nine cows were corralled, and afterwards released on payment of \$1 per cow by the owners. The enforcement of the pound law, which applies to horses, poultry, etc., will give the people who have gardens a chance.

One man whose cow was impounded on Saturday pleaded as an excuse that he did not read the Standard, and therefore had not seen the warning notice. He should have been given a dollar extra for that.

The preacher at the Presbyterian Church to-morrow evening will be Rev. K. Stuart, an Eastern Canadian, who, we understand, is a candidate for the vacancy.

The annual Masonic church parade will take place to Strathmore Presbyterian Church on Sunday, June 23. The preacher will be Rev. T. A. Walker, Calgary, a well-known member of the craft.

Strathmore football team intend holding a smoker in the Maple Leaf Hotel on Monday, June 10. Members of the Association and friends are invited to attend.

Rev. F. S. Scott, Hillsboro', Ontario, who preached here on Sunday, has some interesting reminiscences regarding early days in the northwest. Mr. Scott preached the Gospel in this district in 1895-97. At that time his charge covered from Medicine Hat to Cochrane, and the Strathmore district was uninhabited prairie. The only villages between the Hat and Calgary then were Gleichen and Langdon.

Rev. William Morris, of Orangeville, Ont., and brother of Mrs. A. W. Gilvin, was a visitor here Monday.

The Ladies Aid of the English Church met with Mrs. Sherman at the Maple Leaf Hotel parlors on Wednesday. About fourteen ladies were present.

Don't omit a visit to the Made-in-Canada Train on Tuesday. It will be worth your while.

Another local man tied the matrimonial knot last Saturday. This time it is Mr. Sidney Hyde. The wedding took place at Calgary. Mrs. Hyde is a Lancashire lass, and only arrived from the Old Country last Wednesday. Congratulations.

The Town Hall roof may be a sore point with some people, but don't forget to give the Council credit for the first through clean up the town has had in its history. Keep up the good work.

The C.P.R. Publicity Department is now using the old Immigration Headquarters for offices. They are sending over 200 samples of grains and grasses from this district all over the U.S.A. and Europe.

Study the ads every week. They will save you money.

Take your choice of tables or beds, all in good shape.—W. A. McClintock, Duff Block.

WANTED, small team outfits for ditch work. Have 2000 miles to let. Sizes of ditches from 3 to 8 feet bottom.—Janse, McDonnell & Co., Bassano, Alta. 15-6

Do you own it? Want to sell it? Do you need it? Want to buy it?—W. A. McClintock, Auctioneer, Duff Block

Calgary Exhibition

The Chicago papers of May 31st announce that at the aviation meet at Cicero on the 30th of May, Jimmy Ward who is to make two flights daily at the Calgary Industrial Exhibition, June 28th to July 5th, paid an unexpected visit to the Grand Park at about 5 p.m. in his Curtiss machine "Shooting Star." He flew in thirty miles from the amusement park where he is exhibiting, and returned after a half hour's rest. During the journey he reached an altitude of 9500 feet. He is giving very successful flights at Riverside Park, Chicago, and visitors to the Calgary Industrial Exhibition may look forward with pleasure to witnessing his flights during the Calgary Fair.

The Honorable Richard McBride, premier of British Columbia, has accepted the invitation of the Calgary Industrial Exhibition to officially open the exhibition on Saturday June 29th.

Among the judges appointed for the fair who have already accepted invitations to act are the following: P.D. W. B. Richards of Fargo, N.D., Percheron, Belgians and Suffolk Punsch; W. A. McKinstry, Napinka, Man., Clydes and Shires; Capt. Bobson, London, Ont., Short-horns; Prof. Jarvis, Grimby, Ont., Poultry.

Mr. A. Campbell, Nightingale, has taken a farm at Pincher Creek, and left for there this week.

Mr. M. E. Sly, Strathmore, with Mr. W. J. Triggs, Calgary, spent some days in Claresholm this week at a district Convention of the United Farmers of Alberta. In Claresholm district, Mr. Sly states, the farmer had just passed through a local election and are seriously considering the advisability of running a candidate of their own next election. They point out that in the recent election the votes of even one small union would have decided the election.

The first meeting of the Boy Scouts was held at 4.30 p.m. on Wednesday in the basement of the Methodist Church. The time was spent in drilling. It is hoped that all the boys in town and country will join at once so we will be able to get our marching drills well in hand this month. Our meetings will be on Wednesdays and Fridays at 4.30 p.m. until changed.

L. E. Murray, Scout Master.

Even with three special constables only one solitary drunk took advantage at the town's hospitality on Monday. Some people at the baseball game made comment that the constables might have utilised some of their time keeping the crowd round the diamond in line.

Is the Agricultural Society dead? If it isn't, it hasn't shown any signs of life for a long time back. Strathmore is about the only town in Alberta which is not preparing for an agricultural fair this year, though a Fair here would provide an exhibit second to none.

C. V. Vancosky has the lowest rate in hail insurance.

Within the past few weeks the Standard machine and type equipment has been enlarged, and we have now one of the most up-to-date printing offices in Alberta. If you don't believe it, come and see.

TUESDAY

JUNE 11

From 12 a.m. to 12.45 p.m.

Encouraging Mixed Farming

As another step toward encouraging mixed farming, the C. P. R. will shortly introduce a large egg circle among the farmers in the irrigation block, east of Calgary. It is thought that this enterprise will also have the effect of obtaining the best egg prices for the farmers and also securing a plentiful supply of first-class quality. The C. P. R. supply firm at Strathmore will be the centre of the circle, which guarantees to take all strictly new laid eggs produced on the farms. The innovation will be a co-operative one, and after the company's dining cars and hotels have been supplied the surplus will be sold to the dealers. Cash will be paid for the eggs at six to seven cents above the market price, while the circle will also include trade in dressed poultry.

—Winnipeg Free Press.

The weather is still behaving good though somewhat windy.

It would nearly seem to be necessary to organise a Made-in-Alberta Exhibition to convince some people that they can buy what they require here. One local firm went outside the town lately for a fine job of printing shipping tags without even giving the local printers a chance to figure on it, and yet they expect the people to buy from them, or at least give them a chance to quote prices. That's all we want.

Strathmore 12 Gleichen 3

Quite a bunch of local people went down to Gleichen on Thursday evening and had the satisfaction of seeing their team putting it over the Gleichenites by the score of 12-3. At the start it seemed as though it would be rather an interesting game, but the Gleichen team collapsed in the fourth inning, and after that the result was a foregone conclusion. Bred pitched for Strathmore and Wilson for Gleichen, and both were in good form.

Scoring early. In the first Bred made a long hit, and thereby got round all the bases and home. If he keeps it up he will soon be able to open a shoe store by the end of the season.

Gleichen got ahead of us in the first inning, scoring two runs. Stoff qualified for a pair of shoes the second inning, and his hit also brought Nelson home, so put us ahead again. In their half of the second Gleichen got the equalizer, but their scoring stopped there.

Third innings, both teams drew blanks.

In the fourth the Gleichen ball went up. Everybody seemed to be able to hit Wilson and four runs were scored.

In the fifth nobody on either side got to first base, the fielders being there with the mite's every time.

Sixth innings Jerry Anderson got to third base off a long hit, but had to stay there.

The seventh innings provided another outfit. Nelson was the first to get on the bases, followed by Bred. A big hit by Bob Anderson brought them both in, and Bob got in himself off one of Fred Stoff's long ones. Stevens, a new recruit, went to bat next and brought Stoff in.

In the eighth Haines brought the score up another notch, and Nelson made a two base hit.

The ninth innings did not alter the score, and the game ended as follows:

Strathmore 120000010-12
Gleichen 210000000-3
Teams were as follows:—
Bred P. Wilson
Keene C. McArthur
R. Anderson 1b. Mac
J. Anderson 2b. Williams
Stoff Jb. Benton
Erickson ss. Sturges
Stevens 1b. Watts
Nelson cf. J. McArthur
Haines rf. Stumph
Umpire—Higgins.

In justice to the Gleichen boys, it must be said that this was their first workout as a team, and with another game or two they should keep the score somewhat lower.

Strathmore team worked nicely together. The outfield only missed out by throughout the whole game, and every man got several hits.

HOW OLD IS MA?

WHERE THEY MOURN
American Steel Companies Look at Canada With Envy

American companies which manufacture steel and iron products are gazing with envious eyes upon Canadian railway building. They long for the opportunity to supply rails and other equipment. But the tariff, with its anti-dumping clause, stands in the way. If they want to sell in Canada, they must manufacture in Canada. A special report, prepared under the instructions of the American steel and iron companies, presents the following interesting paragraph for the consideration of the Canadian Government's protective policy may be expressed as follows: First, to impose duties sufficiently high to protect Canadian manufacturers from the competition of the United States; and, secondly, of other countries. Second, to provide bounties in favor of Canadian makers and assist them in every way possible for the time being.

VISIT THE MADE-IN-CANADA EXHIBITION

TUESDAY, JUNE 11, AT STRATHMORE

Next Tuesday June 11th, from 10:45 a.m. to 12:45 p.m. the Made-in-Canada Train Exhibition will be in Strathmore and give a free exhibition of the goods manufactured in Canada that will be well worth seeing. At the hour of going to press the Standard has received a telegram from A. O. Seymour, the C.P.R. representative, stating the train will arrive on time and advise our readers to be in waiting as it will occupy their full time at a cost of \$750.

The Mayor of Strathmore, the President of the Board of Trade and the President of the Agricultural Association have agreed to meet the train officially to represent the town and the former has stated that he expects more than 1000 people will be present to see the exhibit.

Below are some facts concerning the train and the exhibit it carries:

The Made-in-Canada train consists of twelve cars, ten containing Canadian factory products.

The ten cars contain fifty-five individual exhibits, all Made-in-Canada.

Approximately 8,000 individual articles are on view. Everyone is a Canadian factory product of some kind.

The train itself which is 850 feet long was made at the Angus shops of the C.P.R. at Montreal, and is valued at \$150,000.

Mr. A. O. Seymour, general travelling passenger agent of the C.P.R. is in charge of the train.

Mr. H. D. Scully, secretary of the Canadian Home Market Association, have charge of the exhibition.

During the trip 70 different engines will be used, and the special will be in charge of as many cars of 19 men each, which means that at the end of the 45 days, over 1,000 C.P.R. employees will have had some part in operating the special.

The fifty-four exhibits represent a total investment in Canada of \$200,000,000 distributed among 194 branches giving employment to 74,000 men.

Taking four as an average family and 280,000 people are supported by industries represented on the Made-in-Canada train.

The weekly wage of industries represented in the special is

approximately \$1,000,000, or \$52,000,000 a year.

One of the cars is arranged into a miniature dwelling of five rooms, furnished throughout with Made-in-Canada products.

The car occupied by the motor and rubber exhibits has been tiled with 13,000 tiles at a cost of \$750.

A total space of 9,800 square feet is occupied by the exhibit. This is equal to one acre 96 feet wide and 100 feet long.

One of the exhibits is a rubber boat 1 foot high and 2 feet long; "I don't think it would fit me," said the Duke of Connaught in Toronto.

The iron and steel exhibit represents 100,000 different sizes and quantities of iron and steel products.

A Canadian made safe in one of the cars tips the beam at 3,500 pounds.

The paint display includes 44 varieties of paints, 59 of varnish and 10 of white lead.

A miniature plant in an operation showing the process of paint making from pig lead to the mixed article, ready for the brush.

The schedule provides for a trip of 4,000 miles.

The motor and cycle exhibit is music in abundance is supplied by the player piano.

An electrical lighting silver bed is one of the unique exhibits. Also a walnut paneled brass bed.

The Duke of Connaught in Toronto took one hour to inspect the exhibits in Montreal, Ottawa and Toronto.

Pennan's Limited are giving a way 20,000 souvenirs of various kinds.

Five hundred electric lights provide the illumination. These are supplied with current from a local dynamo in one of the cars.

The locomotive is always under full load of steam at night, to provide power for the dynamo.

Mr. T. H. Roca, the lecturer, is an authority on agriculture, and its relation to the home market.

Mr. W. Redpath, the stereotyping operator has 200 lantern slides covering all the home features represented on the train.

They show the size of the factories and

the men going home to lunch. He uses a Canadian made lantern, which is used in 105 churches and Sunday Schools in Toronto alone. Space will not permit us to detail some of the many features of the car, but come and see for yourself.

WESTERN GROWTH

Remarkable Development Revealed by Various Statistics

Building statistics may also be utilized to give a graphic idea of western growth. Last year twelve western cities from Winnipeg to Portland

showed an increase in building of \$6,584,161 on new buildings. Winnipeg took the lead with \$17,000,000.

Wagary occupied second place with \$11,709,474. Regina stood third with \$10,000,000.

Edmonton \$1,737,535. When it is remembered that only three years before the total expenditure of the twelve cities on buildings was only \$1,161,037, then some conception of the growth of the west is gained.

The present year has dawned with due modesty in building. Those who give every promise of carrying the 1911 total far ahead of that for 1911.

The coast cities also exhibit a startling growth in building statistics. Vancouver spent \$3,850,000 in 1910, while in 1911 her building permits reached \$17,000,000.

Assessment figures likewise reflect the activity in building. Winnipeg property was valued at \$41,104,470 in 1910. In 1911 it was \$41,104,470.

Edmonton's assessment was \$4,099,437 in 1910. It was \$12,100,000 in 1911. Calgary showed an increase from \$12,400,000 to \$18,100,000.

Vancouver grew from \$13,417,176 to \$18,100,000. This in the space of seven years is a remarkable achievement.

Another valuable way of showing growth is to refer to the bank clearings. Winnipeg clearing house for 1910 was \$117,600,864.

Vancouver during the same period showed an increase from \$12,400,000 to \$18,100,000.

Edmonton grew from \$13,417,176 to \$18,100,000. This in the space of seven years is a remarkable achievement.

Another valuable way of showing growth is to refer to the bank clearings. Winnipeg clearing house for 1910 was \$117,600,864.

Vancouver during the same period showed an increase from \$12,400,000 to \$18,100,000.

Edmonton grew from \$13,417,176 to \$18,100,000. This in the space of seven years is a remarkable achievement.

CORSICAN CRUELTY.

It Leaped Up Large in Napoleon's Treatment of Children.

Napoleon and a singular story for putting children overboard, which was very cruel, and his new little Archie the victim of his mother's whimsy.

One day the First Consul, putting the new of the little fellow, burst him, and he cried out. To reach him not to cry he said, "I will not let you cry, Archie, having found himself, from back to him in a flying, mixing his little feet.

"You are a villain, a wicked wicked fellow."

To prove the contrary Napoleon should have embraced his nephew and made him forget the pain he had just inflicted by his words of affection.

But Napoleon was not in his character. Corsicans were known for their cruelty.

What it means, and though Napoleon was a man, he was really more of a child than an adult.

He then said to himself, "I will not let you cry, Archie, having found himself, from back to him in a flying, mixing his little feet.

"You are a villain, a wicked wicked fellow."

To prove the contrary Napoleon should have embraced his nephew and made him forget the pain he had just inflicted by his words of affection.

But Napoleon was not in his character. Corsicans were known for their cruelty.

What it means, and though Napoleon was a man, he was really more of a child than an adult.

He then said to himself, "I will not let you cry, Archie, having found himself, from back to him in a flying, mixing his little feet.

"You are a villain, a wicked wicked fellow."

To prove the contrary Napoleon should have embraced his nephew and made him forget the pain he had just inflicted by his words of affection.

THE NUMBER SEVEN.

It Rarely Occurs in the Balance of Weights and Measures.

How would you define "seven"? The Standard Dictionary says it is "more than six." Webster's calls it "more than six or one less than eight."

The Shogun Webster says it is "three and two," and the Century's definition is "one more than six; the sum of three and four."

In metrology—that is, the science of weights and measures—seven is comparatively rare. The seven days of the week form a striking example of its use, however.

Scholars have found, too, that the Egyptians called contained seven breadstuffs. "Cubit" is from the Latin "cubitus," the elbow, or the distance from the elbow to the end of the middle finger.

The Roman cubit was one and a half Roman feet or 17 1/2 English inches. The Roman cubit was used in the building of the pyramids of Giza, perhaps 2500 B.C., has been learned from measuring sticks found in the tombs to have been 30 1/2 English inches.

The Egyptian cubit was divided into six palm or handbreadths, and the use of seven in the Egyptian cubit is ascribed to some investigators to a probable custom of placing the hand behind the elbow when measuring along with the forearm and leaving it on the wall until the arm was held down again.

The cubit was used in the building of the pyramids of Giza, perhaps 2500 B.C., has been learned from measuring sticks found in the tombs to have been 30 1/2 English inches.

OF HIGHER STANDARD

Canadian implements Better Than Those of French Make.

It has been stated recently that France offers a good market for Canadian manufacturers of agricultural machines and tools of various kinds because the articles of this nature used in France are below the standard of those produced in this country.

In agricultural machinery Canada has to compete principally with the United States, which enjoys the same tariff, \$1.05 per thousand pounds on machinery weighing 400 kilograms or more, and \$1.25 on all other machines.

France imported agricultural machinery in 1910 as follows: from the United States, to the value of \$9,085,480 francs; from Great Britain, \$4,450,000 francs; from Canada, \$2,584,000 francs; and from Germany, \$1,677,000 francs.

The general French tariff is \$1.25 and \$2.50, respectively. In the case of tools Germany monopolizes the French market. Germany imported tools in 1910 to the value of \$1,647,000 francs, while the total value of all tools imported into France that year was only \$2,083,350 francs.

The French tariff on tools is \$1.25 "value" of tools and Great Britain would stand the selling tariff at a total of \$7,570 francs. Canada has a total of \$7,570 francs. The tools and will have to follow the tariff of \$1.25 per thousand pounds.

It is, however, being demonstrated that there are unlimited possibilities west of Winnipeg for factory development. This is accomplished largely by lectures illustrated with over two hundred pictures showing the typical industrial scenes. The people of the west are given first hand information as to how they may mean to a community, how they add to the population, benefit mercantile life, and increase economy in the use of money. These lectures during the day are given in the dining car fitted up for the purpose of factory development. There are night stops, some city hall used. This series of illuminating lectures is one of the most interesting and instructive features of the trip.

The lecturer is Mr. J. H. Roca, of Michigan, Ontario, who has represented the Canadian Home Market Association in New Zealand, Australia, Belgium and Scotland. He is a man of wide experience in encouraging industries to locate in the western districts.

This idea is furthered by about twenty manufacturers and their representatives, who are on the train, and are glad to take of the natural resources and other advantages of western districts for manufacturing. In fact, the manufacturer of the East is depending on information gleaned on this trip, to give him an idea of what can be done along industrial lines in the Prairie Provinces.

The exhibition and the various features in connection with it is thoroughly in accord with the policy of encouraging industries to locate in the western districts.

A surprising Degree of Progress is Manifest

Industrially, it may be said that the west shows a surprising degree of progress. While there are no figures available to illustrate the extent of western manufacturing, either in the number of factories, the number of hands employed or the value of the output, still there have been enough developments in the principal cities to prove that manufacturing is gaining considerable foothold. The principal products made in the west are those connected with the building trades, which are necessarily very active in view of the tremendous growth of the cities. But the list also includes several other lines, such as the manufacture of increased population, small factories of every kind, and the growth of large factories to-morrow.

HOME TRADE OF \$80,000,000

The home consumption of dairy products is increasing at a rapid rate. The increase cannot be less than \$10,000,000 per year. This means that our dairy industry is worth \$80,000,000 more of the dairy production than it did last year ago. The total value of the dairy industry is \$100,000,000, which means that our dairy industry is worth \$20,000,000 more than it was last year.

THE TWO GREAT FACTORS

The two great factors in the building of Canada are the farmer and the manufacturer. The farmer is the more important. He has had no gain of experience in the use of the modern machinery of agriculture. The farmer has been captured by extremists, who have applied to agriculture the same sort of fanaticism, and have threatened to secure a permanent of thinking farmers. The farmer is the more important.

Changes of advertisements must reach the office not later than noon each Wednesday.

SATURDAY, JUNE 3, 1911.

Bow Valley Baseball League Opens

Before an attendance of over 1000 people (nearly all Strathmore people), Strathmore started out the Bow Valley League in good shape by winning the first game by a score of 7-0 against Bassano. From the first it could be seen that the Danstitchers had not much of a show. Their pitcher was good, but he did not get the support he deserved. Bried pitched a good game for Strathmore, made the one home run of the game, and also made one error. Bried, which brought in two men. The team did not show any weak spots this time, and every man was on his job.

Mayor Lambert pitched the opening ball of the season, and made quite an expert job of it. The first innings Bassano did not reach first base, while Strathmore made two runs. Second innings both teams drew blanks. The third innings brought great joy to the hearts of Strathmore supporters. With two men on bases, Bried came to bat. One mighty swing sent the ball careering in the general direction of Bow River, and before the Bassanettes could find it again Bried had made his home run, and everybody was wild. Bassano tried to raise a little excitement by a technical argument, claiming that the catcher was closer to the line than he ought to be, but after the rule book had been pretty well turned over, and a lot of words chewing engaged in, Umpire Bremer declared everybody safe.

In the fourth innings nobody got as far as first base, which showed that both pitchers were on to their job.

Fifth and sixth innings were also drawn blank.

In the seventh Strathmore got two men on bases when Bried came to bat, and a well-timed hit from him brought them both in, and landed him on third base.

In the eighth innings Strathmore looked like scoring on a two base hit of Erickson's, but it was not to be.

In the ninth Bassano's heavy weight, Murchison, got round to second base, but he was well there when the third man was called out, and the game ended.

Following were the teams and scores by innings—

STRATHMORE	BASSANO
Bried	1
Kesie	c
R. Anderson	1b
J. Anderson	2b
Stoff	3b
Erickson	ss
Haines	rf
Nelson	cf
Stevens	lf
Umpire, O. F. Bremer	
Strathmore	7
Bassano	0

NOTES
Two of Strathmore's last year's players were with the Danstitchers on Monday. These were Barker and Lomdini. They had a good time renewing old acquaintances after the game.

Strathmore's latest recruits, Stevens, who played left field in Monday's game, come here from Bassano with a good reputation. He is employed in the White and May store.

Bried played his first game for Strathmore this season 1912 on Monday. He seems to be in his very best form, and there is no doubt that he was the hero of Monday's game.

He played his first game for Strathmore this season 1912 on Monday. He seems to be in his very best form, and there is no doubt that he was the hero of Monday's game.

comprising towns like Glencliff, Strathmore, Bassano than playing a lone hand.

The scores made by the teams of the Bow Valley to date make a pleasant contrast to those of the so-called Western Canada Professional League. 27-12 was the score in a game lately between Red Deer and Calgary. Professional baseball must be in a bad way in Western Canada when cities like Lethbridge, Medicine Hat, Saskatoon, and Moose Jaw find it unprofitable to take it up.

Strathmore, according to competent opinion, has a better team now than they had last year. That is going some, when the performance of last year's team is taken into account. One point where they excel this year is that they have several reserve pitchers, Keene, Erickson, and Stoff, being twirled of no mean ability.

Bob Anderson, who last year was the catcher's mask for Strathmore, is now on first base, while Keene is doing the catching, and doing it well too. Bob is finding himself all right in his new position.

Jerry Anderson, who is holding down second base, got most of his baseball experience in Strathmore. Jerry is going to make Strathmore famous some day, if he continues to improve as fast as he has been doing.

The ball grounds are in pretty good shape just now. A row of benches have been put round the diamond, and the fencing covered by wire netting.

Mounted Policeman Murdered Near Brooks

Considerable stir was caused here on Tuesday by the report of the shooting of one of the R. N. W. M. P. constables on Monday. The report transformed into fact by the appearance of Patrol W. Davis was the name of the murdered man, and his slayer was a man named Jim Ham. Corporal Irvine and Constable Todd were in Strathmore at the time of the murder, and immediately they received the information they hurried east to render whatever assistance might be necessary to capture the murderer.

It appears that three Indians came into Brooks, and in some manner managed to secure enough whiskey to put them in a fighting mood. On their way back to Blackfoot reserve they met an Italian and asked him to deliver up the blackie he was carrying. He refused, and they fired several shots at him, without any effect. Wherever the Italian got into Brooks, he informed Constable Davis, who was on patrol in pursuit. The constable was killed about two miles from Brooks, and his body when found by some workmen, was still warm. His assailant, arriving back at the Reserve, was still in a transient mood, but was secured by the other Indians, and taken to Bassano, and afterwards to Calgary Barracks, by Corporal Jones, of Bassano.

The Indians arrested, seem, according to the reports to have shot at several people. Officers of the R. N. W. M. P. are considerably stirred up as a result of the murder of their fellow officer. Davis was a young man about 25 years old, and was considered a most efficient man. His untimely and tragic death is deplored by all the Brooks people and by the forces.

Mr. C. W. McElroy left here last Saturday for his home in Kentucky. He has been resident on his farm south of here since last September, and he has been looking after his property. Mr. McElroy has enjoyed his first winter here, and considers the weather superior to that of the Kentucky winter.

SHERIFF'S SALE

PROVINCE OF ALBERTA
To wit

By virtue of a Writ of Execution issued out of the District Court of Calgary at the suit of the International Harvester Co. and others, plaintiffs, and Geo. A. Wallace, Defendant, and in obedience to the order of the court, I have seized and taken into execution the following goods and chattels, to-wit: 1. A 1911 Buick car, 2. A 1911 Buick car, 3. NERVES AT HIGH TENSION

Necessary in This Age of Keen Competition and Great Accomplishment

When the Body Fails to Support the Brain Back to Health

DR. CHASE'S NERVE FOOD

Nervous people are the salt of the earth. The great men and great women are usually those of nervous temperament.

But it takes an enormous quantity of brain tissue to support the nervous system. A highly tensioned nerve is lacking to conduct the flow of digestive fluids. A little extra excitement is followed by the agony of a "stomach ache."

Unfortunately nervous diseases are not curable by medicine and since your digestive system fails to supply and absorb nourishment you must eat "nerve food."

The great food cure is not a narcotic to depress the nerves, it is a stimulant to whip them into service to recover lost.

Dr. Chase's Nerve Food feeds the vital nerve force, back to health. It feeds the nerves with the only substance from which nerve force can be made, and it costs only \$2.50 at all dealers, or \$5.00 direct from the manufacturer.

It was a Welsh minister who described the devil to a little congregation in a remote village. He said: "The devil is bound round the middle with chains, and round the neck with chains and round the neck with chains."

And the minister who called him "Why he might as well be here" - London Globe.

Mina's Liniment used by Physicians

"You say," said the surgeon, "that you will tell me the whole story of this case."

"Oh, how lovely!" the patient interrupted. "I'll tell you the whole story of this case."

"Dear Madam," Wallace says to me, "I am long and thin, and I am two feet deep."

"You're etc."

"The question has again been raised to medical journals as to whether the increase in the frequency of appendicitis in recent years may not be due to minute particles of food which are not properly digested and which are not properly absorbed."

"I see your wife has her hand in a sausage. What is the matter?"

"I set a mousetrap and put it in my pocket last night."

"Going to make a garden this spring?"

"No, I'm busy superintending that of my next-door neighbor."

"What is the matter?"

"I set a mousetrap and put it in my pocket last night."

"What is the matter?"

"I set a mousetrap and put it in my pocket last night."

"What is the matter?"

"I set a mousetrap and put it in my pocket last night."

ABOUT PAPER MONEY

Machine That Prints Paper Money

At the greatest difficulty which the government has been able to obtain notice of that being able to print money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

Conditions in Japan

That the old customs of Japan are changing and the empire is rapidly becoming civilized, and, more than that, the empire is rapidly becoming civilized, and, more than that, the empire is rapidly becoming civilized.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.

It is a machine which prints paper money in such a way as to make it impossible to counterfeit.
